

## Mosquito Pool Submission Form

### IDAHO BUREAU OF LABORATORIES

2220 Old Penitentiary Rd, Boise, ID 83712

StateLab.idaho.gov Tel: 208-334-2235 Fax: 208-334-4067

[IBLEnvironmental@dhw.idaho.gov](mailto:IBLEnvironmental@dhw.idaho.gov)

### Additional Information:

1. Please complete the submission form as completely and legibly as possible to avoid delays in testing and reporting. Be sure to record the unique tube ID for each vial on the form if using vials provided by IBL. If using your own tubes, then enter your unique ID number on the form and the tube. This is how each pool is associated with the correct collection information and is critical when reporting positive pools.
2. Mosquitoes should be females only and can be stored in the provided mosquito vials. Pools must contain no more than 50 mosquitoes and be sorted by species, collection site, and date of collection (i.e., one species on the same day and site per tube).
3. Vials provided by IBL come pre-labeled with a unique ID containing small ceramic beads for processing the mosquito pool at IBL. Please do not remove the label or beads from the vial. Once collected ensure that the screw-top cap is snug (do not over-tighten) prior to submission to IBL.
4. Mosquitoes should be stored at 2-8°C (i.e., refrigerated) as much as possible and delivered to IBL within 72 hours of collection. If shipping the mosquitoes, ship them for overnight delivery with ice packs.
